DETAILED ACTION

Interference

Interference No. 104330 has been terminated by a decision unfavorable to applicant. *Ex parte* prosecution is resumed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 9, 10, and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Greene et al. (U.S. Patent Number 6,391,853).

Art Unit: 1635

The claims of the instant application are drawn to a purified polypeptide having the amino acid sequence of SEQ ID NO:2, or comprises amino acid residues C₃₀ through P₁₉₅ of SEQ ID NO:2, and to compositions comprising said polypeptides and a pharmaceutical carrier.

Greene et al. teaches the polypeptide of applicants' SEQ ID NO: 2, which comprises amino acid residues C₃₀ through P₁₉₅ of SEQ ID NO:2 (see sequence listing), and also teaches compositions comprising said polypeptides and a pharmaceutical carrier.
